

AMIT DEVBANSHI

Backend Developer (.NET) | Full-Stack Enthusiast

Varanasi, Uttar Pradesh, India | 9336689364 | devbanshamit@gmail.com | github.com/devbanshamit-dev

PROFILE

Backend-focused developer pursuing a Bachelor of Computer Applications (2024–2027), currently working as a Backend Developer Intern at Opyra Multi Solution, building the backend for an ERP system using ASP.NET Core.

Skilled in designing authentication systems, implementing clean architecture, and developing RESTful services with ASP.NET Core, C#, and Entity Framework Core. Expanding into full-stack development with React.js and Tailwind CSS through an ongoing project (StreamXUI), while also exploring containerization and deployment using Docker.

Passionate about building production-ready applications and continuously improving problem-solving and system design skills.

EXPERIENCE

Backend Developer Intern — Opyra Multi Solution *Aug 2026 – Present*

- Working on the backend of an ERP system using ASP.NET Core and C#
- Contributing to API development, business logic implementation, and database integration within a live production codebase
- Collaborating with the team to build and maintain scalable, maintainable backend modules

TECHNICAL SKILLS

Backend: ASP.NET Core Web API, C#, Entity Framework Core, RESTful APIs, JWT Authentication & Authorization

Frontend: React.js, JavaScript, HTML, CSS, Tailwind CSS

Database: SQL Server, PostgreSQL

Tools & Practices: Git, Docker, Clean Architecture (DTOs, Services, Repository Pattern)

PROJECTS

StreamXAPI — Movie Streaming Platform API

- Developed a scalable .NET Web API backend for a movie streaming platform with a structured, maintainable architecture
- Implemented secure authentication using JWT with refresh token rotation
- Designed the backend for seamless integration with a React.js frontend
- Containerized the application using Docker and deployed it on Railway with a PostgreSQL database
- Followed clean architecture principles with proper separation of concerns

StreamXUI — Movie Streaming Platform Frontend *(Ongoing)*

- Building the frontend using React.js and Tailwind CSS
- Creating responsive and modern UI components for better user experience
- Integrating frontend with StreamXAPI backend for full-stack functionality
- Focused on performance optimization and clean UI/UX

LoginSystem_BackEnd — JWT Authentication System

- Built a secure authentication system with user registration, login, and token management
- Implemented role-based access control and refresh token mechanism
- Applied clean architecture with DTOs, Services, and Repository layers

EDUCATION

Bachelor of Computer Applications (BCA) *2024–2027, Currently Pursuing*

Microtek College of Management and Technology, Varanasi

ADDITIONAL INFORMATION

- Currently gaining professional, real-world backend development experience at Opyra Multi Solution
- Actively building and deploying personal backend projects
- Comfortable with version control (Git) and continuously learning DevOps tools like Docker
