

# AMIT DEVBANSHI

Software Engineer | .NET | ASP.NET Core | React

Varanasi, Uttar Pradesh, India | 9336689364 | devbanshiamit@gmail.com | github.com/devbanshiamit-dev

---

## PROFILE

Backend-focused developer pursuing a Bachelor of Computer Applications (2024–2027), specializing in C#, ASP.NET Core, Entity Framework Core, and RESTful API development. Hands-on experience through personal projects involving authentication systems, database-driven applications, clean architecture, and full-stack development with React.js.

## TECHNICAL SKILLS

**Languages:** C#, C++, JavaScript, SQL

**Backend:** ASP.NET Core Web API, Entity Framework Core, RESTful APIs, JWT Authentication & Authorization

**Frontend:** React.js, HTML, CSS, Tailwind CSS

**Database:** SQL Server, MySQL

**Architecture:** Clean Architecture, DTOs, Service Layer, Repository Pattern

**Tools:** Git, Docker, Postman, Swagger, Railway

## PROJECTS

### Portfolio Management System — Job & Skill Management Backend

- Developing a backend system for managing companies, jobs, skills, and job-related data.
- Designed Job, Skill, JobSkill, and JobPublisher domain models using Entity Framework Core.
- Implemented many-to-many relationships between jobs and skills.
- Building service and repository layers for business logic and database operations.
- Implementing DTOs, validation, exception handling, and role-based access patterns.

### StreamXAPI — Movie Streaming Platform API

- Developed a .NET Web API backend for a movie streaming platform using ASP.NET Core and Entity Framework Core.
- Implemented JWT-based authentication with access tokens and refresh token management.
- Implemented role-based authorization and refresh-token rotation.
- Structured the application using DTOs, services, repositories, and separation of concerns.
- Containerized the application using Docker and deployed it on Railway.

### StreamXUI — Movie Streaming Platform Frontend

- Building the frontend using React.js and Tailwind CSS.
- Developing reusable and responsive UI components.
- Integrating the React frontend with the StreamXAPI backend.

### LoginSystem\_BackEnd — JWT Authentication System

- Built a backend authentication system using ASP.NET Core.
- Implemented user registration, login, JWT access tokens, and refresh tokens.
- Implemented role-based authorization.
- Applied DTO, service, and repository layers for separation of concerns.

## EDUCATION

**Bachelor of Computer Applications (BCA)** — 2024–2027, Currently Pursuing  
Microtek College of Management and Technology, Varanasi
